

Index for EMC Seminar 2009

Revision 0
Valid at 01.10.2008

Product Management

Seminars from applicants for applicants – MORE THAN YOU EXPECT

1	Basics	3
1.1	What is inductance?	3
1.2	What is an EMC ferrite?	3
1.3	Magnetic field	3
1.3.1	Magnetic field H	3
1.3.2	Magnetic field B	3
1.4	Permeability	3
1.4.1	Core material parameter	3
1.4.2	Complex permeability	3
1.5	Core material	3
2	Filter & Signal	3
2.1	Filter basics	3
2.2	Low pass filter	3
2.3	Definition self resonance	3
2.4	Mass related Filter	3
2.5	Common Mode Filter	3
2.5.1	Symmetrical signal	3
2.5.2	Example Flyback-Converter	3
2.6	Principal/Construction CommonMode-Choke	3
2.6.1	Bifilar	3
2.6.2	Sectionel	3
2.7	Advantage of the current compensating choke	3
2.8	Recognition methods of the coupling	3
2.9	Impact of the number of turns	3
2.10	EMC- / SMD-Ferrite	3
2.10.1	Example: USB	3
2.10.2	Example: the multi-tasking WE-MLS	3
2.11	Usual mains power filter	3

	Index for EMC Seminar 2009	Revision 0 Valid at 01.10.2008
Product Management	Seminars from applicants for applicants – MORE THAN YOU EXPECT	

3	Insertion loss.....	4
3.1	Definition	4
3.2	S-Parameter Model	4
3.3	Calculation	4
3.4	Practical source and load impedance.....	4
3.5	Source and load impedance in relation	4
3.6	Recommended filter types.....	4
4	Measuring	4
4.1	Filter topologies	4
4.1.1	General.....	4
4.1.2	L-Filter	4
4.1.3	Parallel-C-Filter.....	4
4.1.4	Impedance curve of a condenser.....	4
4.1.5	LC-Filter.....	4
4.1.6	PI-Filter	4
4.1.7	T-Filter	4
4.2	Noise Generator	4
5	Simulation	4
5.1	LTSpice / SwitcherCAD.....	4
5.1.1	SMD-Ferrite current dependent	4
5.1.2	CommonMode-Chokes.....	4
5.1.3	More useful Software	4
6	Layou tips	4
